

Name:- Ashish Singh Chauhan

Course:- BCA VI sem 'A'

Roll no.:- 1121029

Subject:- Info security & Cyber laws

①

Problem Statement :- Define any 3 security aspects of the google account

Objective:- To access all the google's products and services (free and paid), a google account is necessary. Signing up with google account also leads to giving up some personal information. The main objective here is to control the information for google account holder.

Activity:-

(a) Change your google account password.

Before changing the current passwords, few things to remember are:-

- \* Password should be unique
- \* Password should have special character

STEP 1:- Login To your google account

STEP 2:- Click on security option

STEP 3 :- Click on Password

STEP 4:- First enter your current password for verification

STEP 5:- Now, reset your current password and then re-enter it.

STEP 6:- Click on Change password

STEP 7:- Password Changed successfully.

The current password is "AbT@12-3896".

The password contains special characters.

(b) Control what other see about you in google Services.

STEP 1:- Login to your google account-

STEP 2:- Click on ~~per~~ personal info option.

STEP 3:- Now, in this option, click on About Me.

STEP 4:- Many options like change DoB, change Gender etc will appear

STEP 5:- Apply privacy on your personal details.

STEP 6:- Privacy Applied Successfully.

### © Check for Account Recovery.

STEP 1:- Login to your google Account.

STEP 2:- Go to security Option.

STEP 3:- Click on Recovery phone & Recovery Email one by one.

STEP 4:- First you have to sign in again to your google account for verification.

STEP 5:- Now you can recover your account by adding your phone number and Email one by one

STEP 6:- Account Recovery Successful.
