Sub: Cyber Security

Ques: Ans the three security aspect of google account

- ① Prevent unauthorized access to your account =  
Advanced protection requires security keys for sign in to help protect your google data, like emails, document, contact or other personal google data even if a hacker has your username and password they can't sign in without your security key.
- ② Provides extra protection from harmful downloads  
Advanced protection perform extra checks on the download when downloading a file that may be harmful, it notifies you or block the download on your android phone, only apps from verified stores are allowed
- ③ keep your personal information secure =  
To prevent unauthorized access, advanced protection only allows google apps and verified third party apps to access your google account data and only with your permission.
