Akshita

Ques 1-

Ans 1-i) Do a security checkup

Go to security checkup to get personalized security recommendations for your google account including

→ Turn on 2 step verification

→ Turn on screen locks

→ update account recovery options.

ii) update your software

If your browser, operating system, or apps are out of date the software might not be safe from hackers.

→ update your browser, apps & operating system.

iii) Use, unique strong password.

It's risky to use the same password on multiple sites. If password for one site is hacked it could be used to get into your account for multiple sites

→ Manage your password

→ Protect your password from hackers.

iv) Remove apps & browser extensions you don't use

• As more apps are installed on a device it can become more vulnerable. Install only essential app & browser extensions

*absolute*

- Delete or disable apps
- Uninstall extensions on chrome.

(V) Protect against suspicious messages & Content

Hackers can use emails, text msgs, phone calls & web pages to pretend to be institutions, family members or colleagues.

- Avoid suspicious requests
- Avoid suspicious email
- Avoid suspicious web pages
