

Q2. 3 aspects of security of web browsers →

(i) Check Web Address: Deceptive web addresses can be used by fake and fraudulent parties. eg. → ~~www.sbihome.org~~  
www.sbihomes.org

Genuine sites have name in BOLD / darker theme in address bar.

(ii) Look at Security Symbol: A 'lock' symbol in Chrome Browser in address bar tells about security level of websites. It can be seen on websites like online stores or banking sites that use HTTPS.

(iii) Update Browser regularly:-

Regular updating browsers whenever available is advised.
