Problem Statement ÷ Analyze the security aspects of your google account.

Objective -

A Google account is the key to accessing all of Google's products & services, many of which are free. Signing up for a Google account is a quick process, but need to give out some personal information. So the main objective is to control the information for Google account holder.

Activity

(A) Create a Google Account to access to many Google products.

STEP 1: Go to the official site of Google account for sign in.

STEP 2: Click on Create Account & Create your Google account by filling necessary details.

STEP 3: Create password for your account.

STEP 4: Account Created Successfully.

(B) Change your Google Account password.

1. Open your Google Account. You might need to sign in.
2. Under "Security," select signing in to Google.
3. Choose password. You might need to sign in again.
4. Enter your new password, then select Change password.

Five things to remember before changing the current password.

password should be unique.

password should have special characters.

(C) Check Google privacy policies.

You can take a privacy checkup & choose the setting that are right for you:

- Automatically delete web & App Activity
- Automatically delete Location History.
- Automatically delete YouTube History
- make a plan for your account
- Review setting for safe grouping.
- Check third-party access
- Review your ad settings.
