

Name:- Ashish Singh Chauhan

Course:- BCA VI sem 'A'

Roll no:- 1121029 (27)

Subject:- Info security and cyber laws.

(2)

Problem Statement :- Define any 3 security aspects of the browser

~~Objective~~

Objective :- To understand the security aspects of the browser

Activity :- It is vital to configure our web browser since the usage is too much frequent. Also, web browser that comes up with the OS is not set up in secure default configuration.

Not securing web-browser can lead to spyware installation without your knowledge and taking control over your computer by an intruder. Here we will see ~~some~~ 3 security aspects for Google Chrome

## ① Safe browsing

Safe browsing protects you and your devices from dangerous sites

STEP 1: Open google chrome

STEP 2: Go to the setting

STEP 3: Now click on Show Advance Settings.

STEP 4: check "Protects you and your devices from dangerous sites"

## ② Check and use of "Do Not Track" request with your browsing traffic.

"Do not track" is a service provided by chrome. Any effect depend on whether a website respond to the request and how the request is interpreted

STEP 1: open google chrome.

STEP 2: Go to settings.

STEP 3: Click on Show Advance Settings.

STEP 4: Now, you can Turn On/Off this service according to your will.

© Check your payment method saved in browsing.

In this option, you can allow this site to check if you have ~~payment~~ payment method saved.

STEP 1:- Open Google Chrome.

Step 2:- Go to the ~~set~~ setting.

STEP 3:- Click on Show Advance Setting.

Step 4:- Here you will find payment methods for sites and you can turn it on/off according to your will.
