Sem. : VIth
Anirudh

Q-4 Ans :

```
# import library
import math. random

# function to generate OTP

def generate OTP ();

        # declare a digits variable
        # which stores all digits
        digits = "0123456789"
        OTP = "    "

    # length of password can be changed
    # by changing value in range
    for in range (4):
        OTP += digits [math. floor (random. random
                                    () * 10)]

    return OTP
# Driver code
if --- name --- = "--- main ---":
    print ("OTP of 4 digits :", generate OTP()).
```
