```
1)   import random as r
2)   # function for otp generation
3       def Optgen ():
4           otp = ""
5           for i in range (4):
6               otpt = str( r. randint) (1,9])
7               Print ("your one time password is")
8           Print (otp)
9       otpgen ()
```

Output
your one time password is
7311

PROBLEM STATEMENT 14: Encryption and
decryption by Cipher.

OBJECTIVE: To understand the implementation
of cryptographic Cipher.

PROGRAM
```
def encrypt (text, s):
    result = ""
    for i in range(len(text)):
        char = text[i]
        if (char, isupper()):
            result += chr((ord(char)+s-5)%.26
                          +65)

        elif (char=""):
            result = result +""
        else:
            result + = chr((ord(char)+s-97)%.
                          26+97

        return result
S = 3
text = "Attack from North"
Print("encrypted Text:" +encrypt (text,s)
Print(" DecryptedText:"+encry
                          26 -s))
```

(a) Create a google account to access to hoogle prde

STEP 1 Go to the official site of google account for sign in

STEP 2 Click on Creat Account and create your google account by filling neccessary details

STEP 3 Create Password for your account

STEP 4: Account Created sucessfully
My email id is ashishbisht460@gmail.com

(b) change your goole Account Password
Few thing to rember before changing the current passowood :

(i) Password should be unique
Password should have special Characters.

STEP 1 : Login into your google account.

STEP 2 :- Click the security option

STEP 3 : Now, click on Password

STEP 4 : First you have to enter your current Password for verification.

STEP 5 :- Now - Reset your current Password and then re-enter it .

STEP 6 :- Click on Change password

STEP 7 :- Password change sucessfully
